## WE ASK SPECIAL ATTENTION TO THE THREE ELEGANT HOUSE PLANTS SHOWN ON OUR FIRST COVER PAGE

They are the "PICK OF THE SEASON," and among the choicest and most satisfactory plants for the living room and conservatory we have ever offered.

### New Browallia Grandiflora—Violet Blue

This is indeed a grand plant for the house and window garden, makes nice bushy plants, 8 to 10 inches high and almost the same in width, throws up its large deep blue flowers in wonderful profusion the whole season. The foliage is pretty and bright and the flowers continue to come, so fresh and beautiful, week after week, and month after month, that it is fairly entitled to be placed among the most valuable house plants recently introduced. Those who have tried it say it beats all for constant bloom and exquisite color, and cannot be recommended too highly. 15 cts. each, postpaid.

### New Parlor Abutilon—Infanta Eulalie

We take pleasure in recommending this most charming plant for the window garden and conservatory. It is a neat, handsome grower, and produces exquisite large cupped flowers in wonderful profusion for months at a time, Winter and Summer, as long as kept in growing condition. Begins to bloom when only a few inches high, and the color is lovely, soft satiny pink as shown in the plate. It is a most beautiful and satisfactory plant for house and conservatory in Winter, and the flower garden in Summer, and has few equals, in ease of culture and constant beauty of bloom. 15 cts. each, postpaid.

### New Lady Fern—Polystichum Prolifera

Truly a most beautiful plant for parlor, library or conservatory, also for the window garden and table decoration. It is yet quite rare and scarce, but wherever seen is recognized at once as a plant of exquisite beauty, entirely out of the usual. It is extremely graceful in habit and growth, as shown in our colored plate, and besides its beautiful form the fronds have an exquisite moss-like, velvety appearance, impossible to describe, but of the most refined and delicate beauty. People remark, "It is the most lovely fern I ever saw." It certainly has no equal, as far as we know. It is no trouble to manage, will thrive and retain its exquisite beauty for years in the parlor or living room, with only ordinary care. There are few plants so handsome and easily grown. Strong plants, 25, 30 and 35 cts. each, postpaid. Extra size, 40 and 50 cts. each, express, buyer paying charges.

**Special Offer** The above Set of Three—1 New Browallia Grandiflora, 1 New Abutilon, Infanta Eulalie, 1 New Lady Fern, only 45 cts., postpaid, or 3 collections for \$1.25. THE TWO COLORED PLATE SETS, when ordered together, only 85 cts., postpaid.

**IMPORTANT NOTICE.** In reply to frequent inquiries, we would say we have no connection whatever with any other company. Do not be misled because you see the name Dingee & Conard Co., unchanged. Neither Alfred F. Conard or Antoine Wintzer have any connection with that concern, but long since left it entirely, and though that Company still retains Mr. Conard's name, because they think it to their interest to do so, and cannot legally be prevented, he has severed all connection with them years ago. All communications intended for Alfred F. Conard or Antoine Wintzer should be addressed to THE CONARD & JONES CO., West Grove, Pa., where they will receive prompt and careful attention. Please be careful to always address

### BEAUTIFUL FRINGED CHINESE PRIMROSES (Primula Sinensis Fimbriata.)

The Fringed Chinese Primrose is well known as one of the most beautiful and satisfactory house plants for winter flowering. It is never troubled with insects, and will thrive and bloom beautifully where there is but little sun, and few other flowers would grow. We offer strong, vigorous plants, many already in bud and bloom, they are a very choice strain, in fine mixed colors only, including Pure White, Purple, Rose, Scarlet Spotted, Striped and Blue. Plants are quite hardy, require very little attention and should bloom all winter. Price, 15 cts. each, 2 for 25 cts., 6 for 65 cts., \$1.25 per dozen, postpaid.

## BULBS FOR WINTER FLOWERING

**W**E are glad to again ask your kind attention to our splendid stock of Imported Bulbs for Fall Planting. Bulbs are the sweetest and most beautiful of all flowers for winter blooming, the easiest to grow and surest to bloom. Lovely Easter Lilies, Hyacinths, Tulips, Narcissus, Crocus, Scillas, Etc., besides being entirely hardy in open ground bloom beautifully during winter when planted in pots or boxes in the house, and are among our very finest winter bloomers. Bulbs for house culture and winter bloom should be planted as early as convenient, from September to January. Any soil that is suitable for other plants will grow nice bulbs; old well-rotted manure is the best fertilizer. Pots or boxes of any convenient size may be used. Small bulbs can be set very close together, sometimes several in a pot; larger ones need room in proportion to their size. Do not plant too deep, one inch under ground is about right for house culture. When potted, water thoroughly and set away in a cool dark place for two or three weeks to rest, and give the roots time to start, then take to the living room or wherever they are to remain; they do not require much heat, an up-stairs room suits them nicely. Water only when they need it, but be sure they do not get dry at the bottom. They will soon begin to bloom and then their lovely flowers and exquisite fragrance will surprise and delight all who see them.

Bulb Diagram.

**Bulbs** IN OPEN GROUND.—Tulips, Hyacinths, Narcissus, Crocus, Snow Drops, Scillas, Ixias, Sparixias, etc., are the finest bulbs for Fall planting in the flower bed, as they are entirely hardy and make a splendid display of gorgeous flowers very early in Spring, almost before the snow is gone. Their flowers are exquisitely beautiful and always highly valued because they come before all others. The culture is very simple, and what is better, they are absolutely sure to bloom. Other flowers may fail but **bulbs never**.

Bulbs do not require very rich soil and will succeed well in any ordinary ground; when convenient, it is well to spade up the ground, so that it will be a little higher than the surrounding surface, and keep water from collecting on it. If the soil is poor, a liberal quantity of old, well-rotted manure should be spaded in or applied to the top as a mulch.

**TIME TO PLANT.** September, October, November and December are the best months for planting bulbs in the open ground. Set them from one to six inches apart, according to variety and size, and from one to five inches deep. The bulb diagram above shows the proper depth and distances apart for the different varieties.

**WINTER PROTECTION.** These bulbs are entirely hardy and will do without any protection, but if convenient to give the bed a light covering of leaves or litter after planting, the flowers will come earlier and be finer. The covering should be removed gradually as soon as the plants show through in the spring.

**TREATMENT AFTER BLOOMING.** When pot bulbs are done blooming they can be set away in any cool, dry place and left a few weeks to mature, after which they may be shaken out of the soil and stored away till time to plant again in the Fall. They may not make as fine flowers the second season as the first, but will usually do quite well for two or three years. Bulbs in open ground, when done blooming and well matured, may be lifted and dried off, and then treated exactly like those from pots.

## Early Flowering Roman Hyacinths

ROMAN HYACINTHS are among the handsomest and most desirable of all bulbs for early Winter flowering. They begin to bloom very quickly and throw up a great mass of sweet and lovely flowers almost before other bulbs get started.

When planted early they can easily be had in bloom by Christmas, and will continue in perfection for several weeks, if not kept too warm. They come in lovely shades of white, pink, blue and yellow. The flowers are borne gracefully on tall stems and are delightfully sweet. They grow easily in pots, boxes or glasses, require no special treatment and are absolutely sure to bloom. Though recommended for house culture, they also do well in open ground, and will bloom very early in the Spring.

## New Crimson Chenille Plant.

(Acalypha Sanderi or Comet Plant)

THIS cut is a representation of the plant as it really appears, and is not at all overdrawn. It grows 10 to 12 inches high, blooms quickly and abundantly, and the flower tassels grow as long as the plant is high. They are covered all over with fine crimson flowers, looking almost exactly as if made of crimson chenille or silken plush. The plant likes heat and moisture, and good rich soil, but grows easily and blooms so quickly, that many are beginning to flower when sent out. When warm weather comes, set out in the flower bed, and it will grow the whole season. It is a most surprising novelty and a great curiosity. **Strong Plants, 20 and 25 cts. each, postpaid. Extra size, 35 and 40 cts. each, by express.**

The bulbs are very large and each one sends up from five to twelve flower stems, which bear great clusters of large pure white wax-like blossoms, with yellow centres, and of a rich delicious fragrance. About one bulb in three will produce double flowers, the others single, as shown in the engraving. They grow nicely in pots of ordinary soil, but the best and quickest way to bloom them is in water. Fill a bowl or some similar vessel with pebbles or small stones, in which place the bulb, setting it about one-half its depth, so that it will be held firmly, then fill with water to the top of the pebbles, and place in a warm sunny window. The bulb will at once commence a rapid growth and bloom in two or three weeks. Ours are the genuine Chinese Sacred Lily, grown in China. Cheaper bulbs are offered, but they are an inferior grade, and not to be compared with these in beauty. **Ours are the genuine variety, grown in China. **SEND YOUR ORDER TO-DAY.**—These Bulbs will keep in any warm, dry place till wanted; or, if preferred, will book your order and send when desired. **FALL PLANTING** Of course, all Hardy Bulbs, such as Hyacinths, Tulips, Narcissus, Crocus, Etc., must be planted in the Fall, whether in the house or open ground, as they require time to unfold their beautiful flowers for Spring; and besides Bulbs, many people prefer to plant Hardy Two and Three-Year Old Field-Grown Roses, Shrubbery and Garden Fruits in the **Fall also**, as it is difficult to get them as early in Spring as desirable, and if planted in the Fall they not only make root growth during Winter, but are in position to start as early in Spring as the season permits, which is frequently a great advantage. See List of Hardy Field-Grown Roses, Shrubbery and Garden Fruits for Fall Planting, pages 36, 37, 41 and 42.

## SPECIAL OFFER— COLLECTION B.

**DIRECTIONS**—Plant in open ground as soon as convenient—any time from September to January—three inches deep and three or four inches apart, according to size, in any ordinary ground; give a light covering of leaves or litter during Winter. A circular bed three feet in diameter will hold this collection nicely, and their wonderful beauty will surprise you. **Price, 75 cts., Postpaid.**
